

The data exchange format

For improving your business efficiency

Contents

1. WHY FAB-DIS?

2. FOCUS ON QUALITY

3. EASY-CHECK by FAB-DIS

Part I

Why FAB-DIS?

Try it and you'll see

Part I: Why FAB-DIS?

I. 1.

The objective

Master the digital revolution

Context

The digital transformation places
 product data at the heart of business
 development

and encourages players to challenge their practices

Situation

The increase in the number of formats for sharing the same data runs contrary to the requirements of productivity and Time to Market!

A bit of work... and a solution! FAB-DIS

- To produce, share and integrate the data needed for product marketing more efficiently
- Simplify and speed up the placing of offers on the market
- Encourage and reinforce customer access to up-to-date data

FAB-DIS is...

... A common format that defines all of the product data to be provided and how it must be presented

Easy to integrate

Structured, Stable

Universal

adapted to trade diversity

Accessible

without restrictions or counterpart

The vehicle for your data

Specific

Optional

Mandatory

The vehicle for your data

Human mapping

(organisation)

Manual or automated entry

Technical mapping

(ETL translator)

Stability + Clarity

PREREQUISITES for AUTOMATION

production, inspection and integration of files

5

FAB-DIS is a database that stores the data of all manufacturers

FALSE

All of the fields in a mandatory block must be completed FALSE

The FAB-DIS format and the training materials are accessible free of charge

or

FALSE

► FAB-DIS formalises sales policy data and contains distributor net prices

The conditions negotiated are managed in a separate file, using new indicative templates

ETIM is a mandatory data block

Part I: Why FAB-DIS?

1. 2.

The benefits

The whole value chain wins!

DATA = the heart of the Digital strategy

- Hyperconnection, adapt our tools to new consumer needs
- Reconcile Smart & Big Data to qualify and enhance data via media and characteristics
- Agility for circulating and promoting your product offers on the many communication channels
- Capture the customer's attention

Central offices and distributors = 1 common language

An urgent need for multi-specialists

- Example of a Group of 200 independent companies
- ▶ Referencing of more than 1,000 Supplier trademarks from 7 different business lines
- 5 million product references

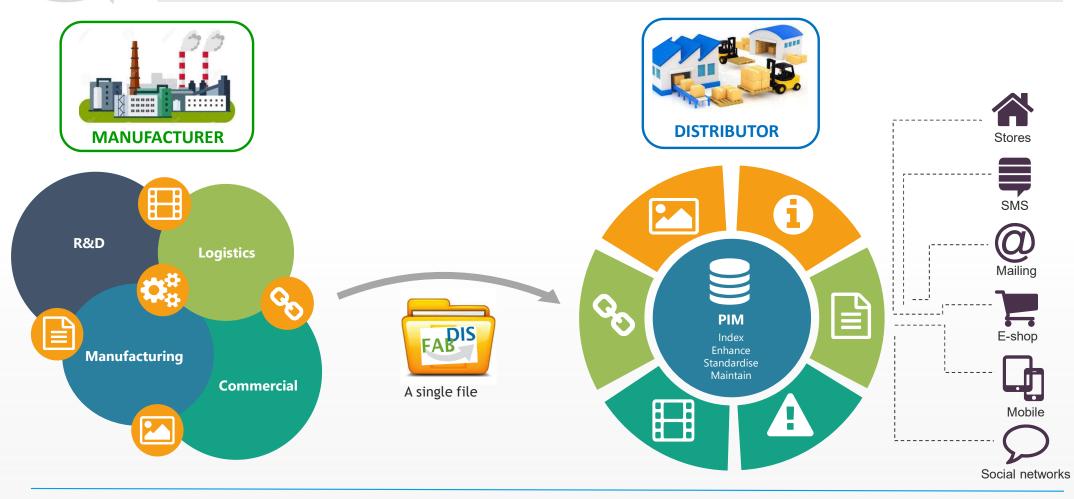

Structured and enhanced digital exchanges

Manufacturers: What are the benefits?

Time saving and optimised process

- Circulation of a single format for all customers
- Enhancement in stages, progression and increased reliability of data
- Independent compliance monitoring
- Quicker data updating process
- Reduced risk of errors and disputes

Manufacturers: What are the benefits?

Optimisation of product offers

- Simpler, quicker referencing of offers
- Better announcement effects
- Easier commercial actions
- Time to market and life cycle managed
- Optimised integration of **multimedia formats** (video, photos, etc.)
- Emphasis on performance and proof of compliance

Distributors: What are the benefits?

Quality of the information produced

- Completeness reconciling fullness + lightness (mandatory/optional blocks and data)
- Adaptability to different business lines (electricity, heating-sanitation, tools, PPE, decoration, etc.)
- Improved responsiveness through update facility (new product data + enhanced data)
- More information for the end user (media, sales pitches, cross-selling)
- Relevance of the technical characteristics (ETIM -> product selector)

Distributors: What are the benefits?

Time saving and optimised process

- Single format regardless of the supplier, ease of integration
- Certification of the format of the files exchanged (see Easy-Check tool)
- Improved info for end users (paper and online media)

Make everyday life easier for customers

Optimise the omni-channel route

Fluidity, Consistency, Relevance

The whole value chain wins!

Part I: Why FAB-DIS?

Feedback!

The digital identity card

FAB-DIS is the digital identity card of your products!

Pauline Mispoulet

Director of Operations

It is essential for making your products visible in the various points of contact and sale.

For the increasingly connected installation engineer, precious time is saved for creating even more value and better advising customers!

The solution to our problem

FAB-DIS Discovery

- Discovery of the format and the tabs by a Distributor
- The "WOW" effect!
- Format assimilated thanks to the educational and illustrated user guide
- Integration of data at Kärcher =
 - Scattering of data
 - A single person mobilised for Referencing
- FAB-DIS = Invaluable for formalising our DATA and highlighting shortcomings (e.g. logistics)

Centralise data to circulate it

Advantages according to Kärcher

Centralisation of our DATA in a single file

"FAB-DIS is becoming my benchmark"

- Standardisation and enhancement of data: update of a single file
- Independence: no need to call upon a service provider who won't do any better
- History management: prevents the loss of data
- 1 strong desire: to recommend to our central offices our rich and up-to-date FAB-DIS file: EQIP (Fedis, Seba, Legallais) MABEO (Tereva)...

Manufacturer of attachment systems

Without FAB-DIS

- An incalculable number of exchange formats
- Comprehension problems between supplier and customer
- Referencing is time-consuming and cumbersome
- Team dissatisfaction/stress during referencing periods
- Little added value

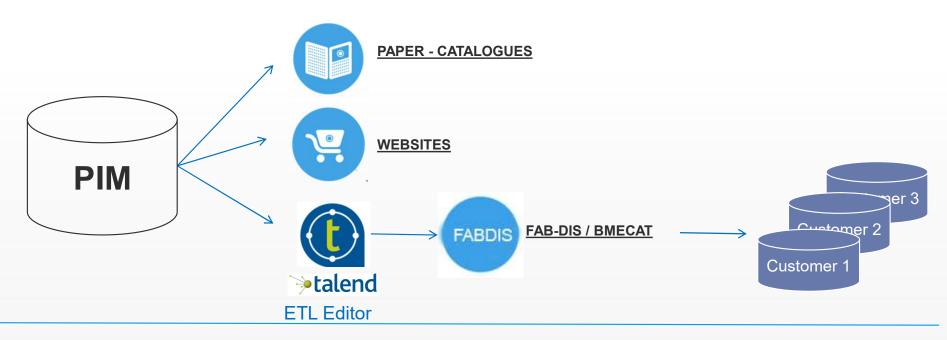

WASTED TIME -> WASTED MONEY

Implementation solutions

- Introduction of a PIM (Product Information Management) solution
- Introduction of ETL (Extract Transform Loading) for "mapping" data
- Use of the FAB-DIS exchange standard

Benefits with FAB-DIS

- Standardised exchange format (technical simplicity via Excel)
- Better collaboration with our customers (we speak the same language, fewer errors)
- Referencing quality (images, documents)
- Accelerated referencing (for us and for our distributor customers)
- Referencing period better managed
- The teams enjoy peace of mind and bring added value

SAVE TIME -> SAVE MONEY

All systems go for FAB-DIS!

Current situation

- Complete a multitude of distributor matrices with their own specific features
 - -> Time-consuming and no added value (same data to be reformatted)
- Driving force of the distributors to encourage manufacturers to commit to FAB-DIS
 - -> Desire to see everybody quickly get on board with this win-win approach

FAB-DIS solution

- Choice of reworking qualified and enhanced data in a single centralised file
- Help tools: Manual + Easy-Check document + Advice from FAB-DIS commission
- The positives: possibility of integrating the specific features of PPE!
- To be improved: Technical "ETIM" data for populating product selectors
- Challenge: updating work

One SME

30 people 1,500 products

En route since Sept. 2017 (FND workshop)

The need:

- Structure
- Save time

▶ The promise:

- Facilitate and
- Accelerate referencing of offers

What are the advantages for an SME?

Less complex database management

- A single file structure
- No interpretation on the expected data
- Possibility of anticipation with a single format for all of our customers
- The file sent to 1 contact can then be used by all of its departments (marketing, logistics, etc.)

▶ A more interactive and more dynamic commercial offer:

- Offer new ranges more easily
- Offer new products more often
- Put forward more sales arguments

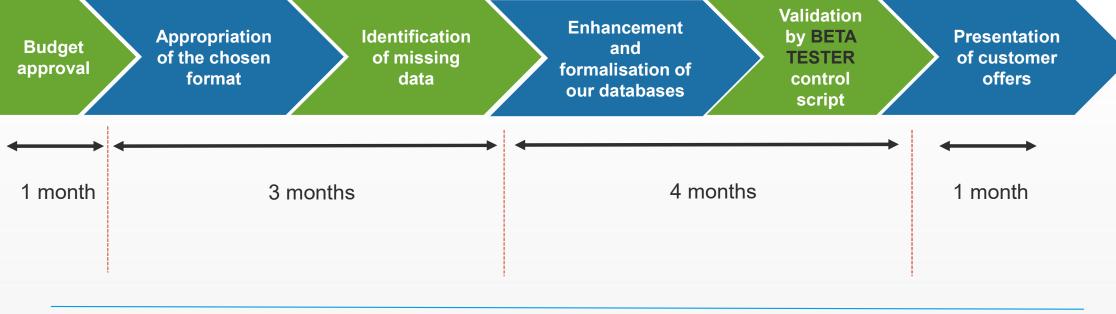

Quick implementation

September 2018

And now?

Next few months

Appropriation by our Distributors

Development of ERP

Implementation at Villeroy & Boch

2017

Transmission to Distributors of a standard Excel file with product info

IN 2017

- Increased awareness of data professionalisation
- Need to find a common medium for all distributors and manufacturers -> FAB-DIS solution

Implementation at Villeroy & Boch

Preparation of the FAB-DIS file upstream

- Gather product information throughout the year at local level
- Anticipate the internal creation of data contained in the FAB-DIS when new products are launched
- Keep up to date with format developments

▶ Generation of the FAB-DIS file

- Use the FAB-DIS Manual: very detailed and explicit
- Use Easy-Check Gold, the test tool, to easily find errors and make changes before transmission to Distributors
- Systematically transfer the FAB-DIS with each Distributor codification request in order to standardise and generalise this medium that meets our requirements

The **sealing** benchmark in the **plumbing** & **heating** world

Capitalise on our strengths

- An old article database with exploitable commercial and logistics data
- Reliability requirement as part of a controlled industrial process accompanied by rigorous controls
 - e.g. product dispatch automatically suspended if a few grams are missing from packaging

Our multi-channel presence has allowed us to structure this approach and comfortably move to FAB-DIS

Commit STEP by STEP

- Lastly a single matrix for our main brands on the professional market (unlike other circuits)
 - Better structuring of our data, which calls for discipline
 - Reliability and increased flexibility thanks to the new naming formats (URL)

- "You don't have to be perfect to be FAB-DIS"
- Even though not everything is ready in the required format yet (SDS, visuals, etc.), a lot of our content can be integrated already
- Then move forward by completing our FAB-DIS according to our priorities

Good to know...

- Make sure you have the time and resources to:
 - Enhance the file and provide info that is as clear as possible
 - Be permanently up to date... and internal needs to be met (ERP, etc.)

- In more technical terms:
 - Column headings do not always speak for themselves so the User Manual often needs referring to
 - Risk of error generated by the conversions of the legal unit (invoicing by volume, weight, etc.) takes time

And tomorrow?

Focus on enhancement of our FAB-DIS file

- Format appropriate to increasingly advanced and scalable management of content/data to be in tune with the web
- FAB-DIS all the more useful as the development of the supply chains will call for more responsiveness and therefore more reliable info to be provided quickly

Approach initiated with a service provider to improve responsiveness and control

Correct use of data

TITLE BLOCK - addition of an optional field

To highlight a

legal notice on correct use of the data and media

contained in the FAB-DIS file owned by the manufacturer.

e.g. provision of the FAB-DIS file does not entail transfer of any intellectual property right to its recipient. Any reproduction, even in part, is strictly forbidden without the written authorisation of our company.

Part I: Why FAB-DIS?

I. 3.

FAB-DIS community

Guarantee of durability

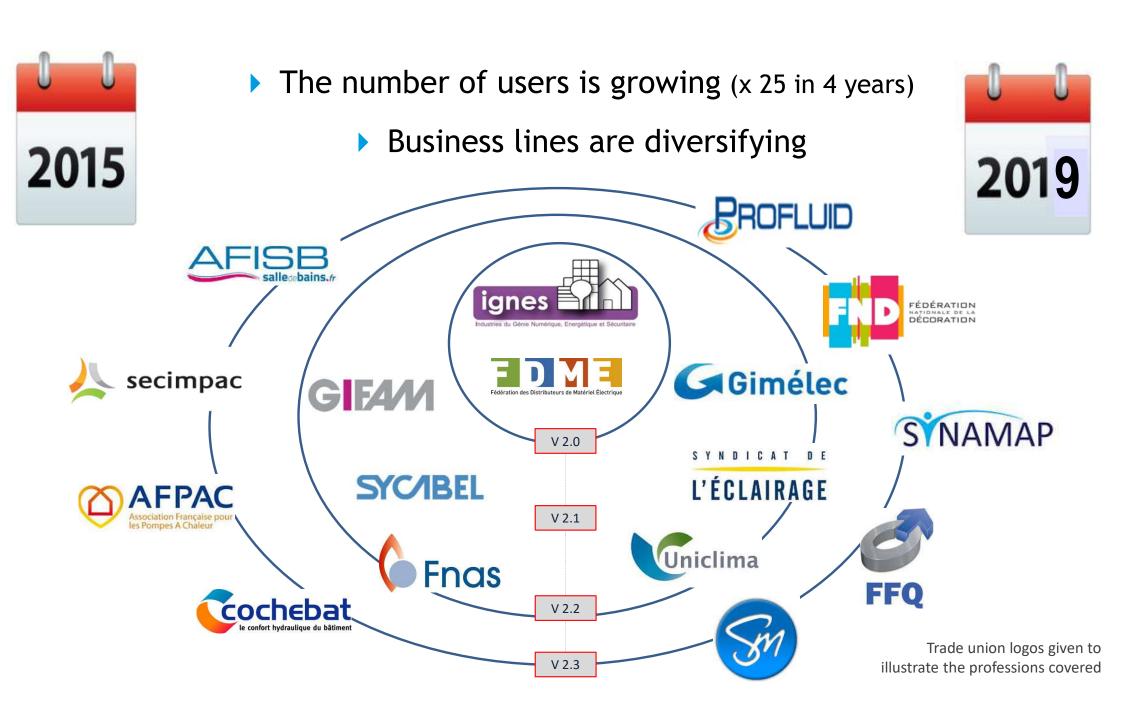

As the community grows, FAB-DIS evolves

Permeability of the networks, shared issues, etc.

The FAB-DIS community extends to construction, industry and infrastructures, revealing 3 necessities:

- Specific adjustments of the format
- Tools for accompanying the transition to the FAB-DIS format
- Organisation that reconciles openness and efficiency

Virality continues...

- ✓ Hydraulic/electric heating
- ✓ Tools & attachment
- ✓ Ventilation & air conditioning
- ✓ Decoration & DIY
- ✓ Personal protective equipment
- Fluid control and plumbing
- ✓ Electrical installation equipment
- ✓ Industrial process
- ✓ Sanitation & Bathroom
- ✓ Lighting equipment
- ✓ Fire safety equipment
- Infrastructures
- ✓ Safety and communication... ...

Community: Missions

Guarantee FAB-DIS access to as many people as possible (free of charge format, user independence, etc.)

Unite and respond to user needs

(change requests, business uses, regulations)

Ensure a high level of data quality

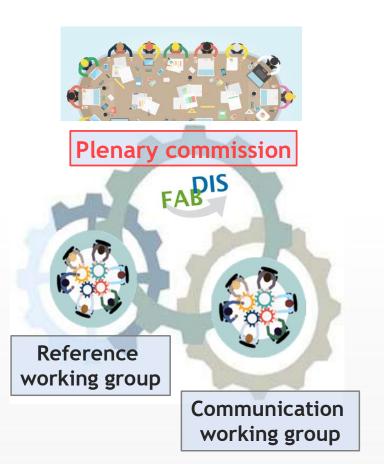

(rules for use, promote Easy-Check, training)

Reinforce market deployment FR + EU (partnerships, translation, etc.)

Community: Operation

Sharing of experiences & expertise

- Representative of the diversity of the players (sectors, company size, maturity of the info system, etc.)
- Organised by around 30 experts with a variety of profiles (marketing, data manager, logistics, communication, etc.)

Open and responsive organisation

- Collaborative and transparent process (FAB and DIS parity, satisfaction survey, consultation on needs, etc.)
- Involvement of building supplies, industry and infrastructure via union mandate

Partnerships

Professional organisations

- ASSIGN representatives
- RELAY the surveys + info

- ▶ **PROMOTE** the approach + tools
- ▶ **RESPECT** the ETHICAL values
- **PARTICIPATE in** evolution of the format and the tools

Part II

Focus on Quality

Reliability and completeness of data for commercial efficiency

Part II Focus on quality

II. 1.One format for all

The free, multi-sector solution for simpler referencing

Try it and you'll see

2 main strengths

- Format available free of charge
- Template legible by all (Excel)
- Precise descriptions of the expected characteristics
- Multiple examples and training materials

- Unique and stable structure
- Multi-sector maturity and completeness
- Consideration of regulatory changes
- Agility of the model without affecting its structure

New **V2.3** enhanced on 01/09/19

ENHANCE TO:

Extend the scope of use Declaration of conformity (Regulated measuring instrument/gas meters + PPE, etc.), Units...

Multi-sector appeal

- Facilitate its integration More precise descriptions (e.g. F-GAS), richer examples, list of values authorised for each field, etc.
- Integrate regulatory or technological developments Updating of Eco-contribution and Batteries Tables, Integration of new Gas + Customs Tables checked by Easy-Check)

Upward compatibility & Preserved structure

New **V2.3** enhanced on 01/09/19

Remain agile and listen to requirements

EXPRESS:

• **Prices** by the hour (training, etc.), by the litre (additive, etc.), by the kilo (softening salt, etc.), by the metre (annealed copper), by the m² (heated floor slab), and even with no price (custom: "contact us")

Multi-sector appeal

• **Dimensions** of bare products on rolls (boiler installation pipe, etc.)

 Packaging: packs and plates (strips, panel), aerosol cans (lubricant), plastic attachments with eyelet (gaskets, connectors, etc.)

CONTENTS

- > 190 characteristics
- Precise descriptions
- 1 Title block
- 15 Tables of values
- > 350 training examples
- Preconfigured templates
- Tips and tools

Cell and battery technology

Website: Main tools

- User manual FAB-DIS Version 2.3-Release 2019
- Changes Log: comparison V.2.2 / V2.3-Release 2019
- Example of FAB-DIS product referencing files
- Preconfigured templates in XLS and Access format
- Answers to frequently asked questions
- Presentations (summary, surveys, workshops, etc.)

Free download

Negotiated conditions: **Indicative** template

A separate file in addition to the catalogue

- "One-to-one" Manufacturer ⇔ Distributor exchange/negotiation
- Price review without change to product catalogue
- Timing and different contacts (buyers, sales personnel, etc.)

Shared semantics on key points to be completed freely

According to negotiation

- Discounts by family or by product
- Net purchase price of the product

Part II Focus on quality

II. 2.

Descriptions and units

Two key elements of the sales action

Why describe a product properly?

Article L 121-2 of the French Consumer Code

Une pratique commerciale est trompeuse si elle est commise dans l'une des circonstances suivantes :

- 1° Lorsqu'elle crée une confusion avec un autre bien ou service, une marque, un nom commercial ou un autre signe distinctif d'un concurrent ;
- 2° Lorsqu'elle repose sur des allégations, indications ou présentations fausses ou de nature à induire en erreur et portant sur l'un ou plusieurs des éléments suivants :
- a) L'existence, la disponibilité ou la nature du bien ou du service ;
- b) Les caractéristiques essentielles du bien ou du service, à savoir : ses qualités substantielles, sa composition, ses accessoires, son origine, sa quantité, son mode et sa date de fabrication, les conditions de son utilisation et son aptitude à l'usage, ses propriétés et les résultats attendus de son utilisation, ainsi que les résultats et les principales caractéristiques des tests et contrôles effectués sur le bien ou le service ;

Important:

Quality (description), composition, quantity, fitness for use

Descriptions: CLARITY for customers!

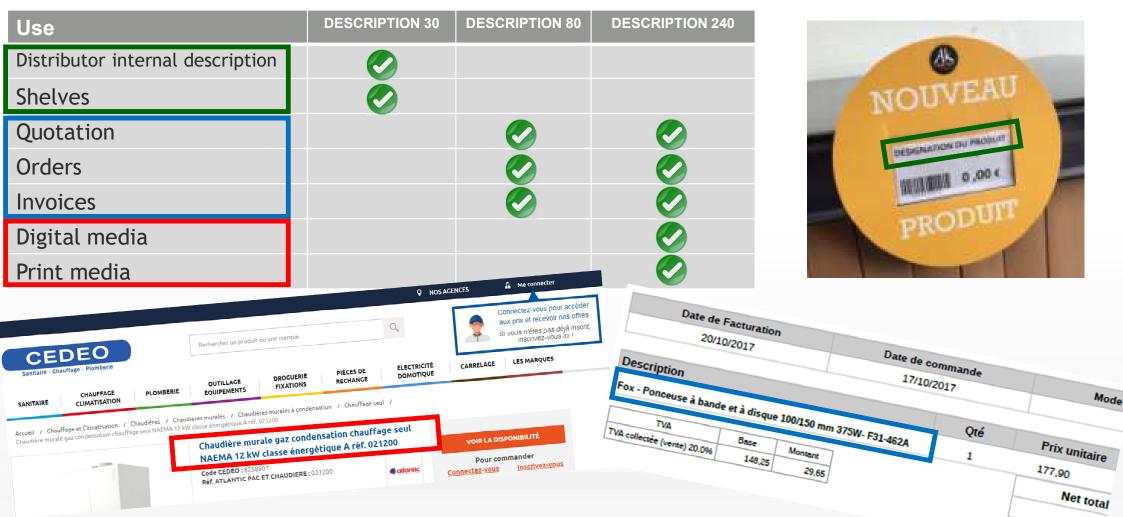

DESCRIPTIONS must be EXPLICIT and fit for purpose

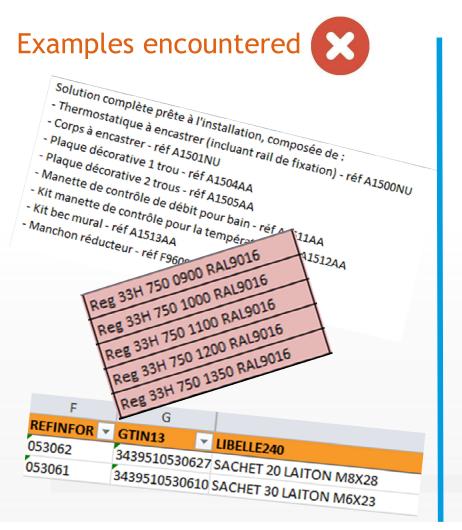

3 descriptions for different uses

Not too much, not too little... Just right!

Appropriate descriptions

ALLEGRO built-in washbasin assembly kit, plate 1 or 2 holes, lever with sleeve and wall-mounted spout (delivered without flush)

The description is not a sales pitch (see Media)
117 characters compared with 380

REGGANE 3000 integrated hot water radiator type 32C horizontal white, 2,100 mm wide, 400 mm high, 2,800 W

The description is not a manufacturer internal reference

Brass Peg M8x28 for lightweight applications (Pack of 20)

The form is important

(e.g. upper case to be avoided in the Description 240)

Morality...

Take great care with descriptions

- ▶ The first impression the customer gets (e.g. quotation)
- The first element of our sales action!

Otherwise, we are exposed to risks

- Customer disputes & penalties (misleading commercial practice)
- Decline in sales

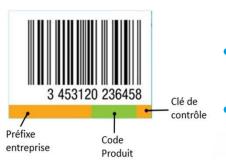

The GTIN (Global Trade Item Number)

Unique identifier that indicates, regardless of its form (12, 13 or 14 digits):

A trademark (and the owner of this trademark)

- + The product
- + A unit (unit of sale, logistics unit(s) (pallet, box, etc.))

Keystone of catalogue management

- Guarantee referencing of products in ERPs
- ▶ And their recognition/exploitation in all sales channels (EDI application, logistics centre, merchant site, etc.)

More info on https://www.gs1.fr/

GTIN

Commerce

▶ 1 GTIN per commercial reference, which represents the unit of sale to the end customer (QMVT)

Logistics

GTINs for each type of packaging that exists
 (QCT) for a commercial reference

To achieve logistical excellence, each unit must have a GTIN

Guarantee referencing in ERPs

Optimise stockWarehouse/Self-Service/Platform

Facilitate installation and maintenance

The units in FAB-DIS

▶ The basic unit is the pivotal unit (UB - Commerce Block)

The unit of sale to the end customer (QMVT - Commerce Block)

▶ The packaging unit (CT - Logistics Block)

Several solutions for the same product

FAB-DIS agility enables freedom of choice

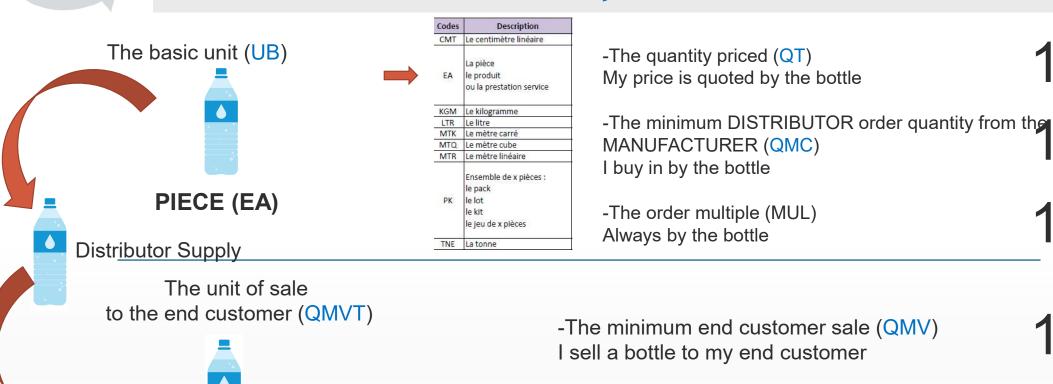

BUT

Ensure the consistency of the description

which depends on the unit of sale to the end customer

Manufacturer price by the bottle, sale to the distributor by the bottle, distributor sale to the end customer by the bottle

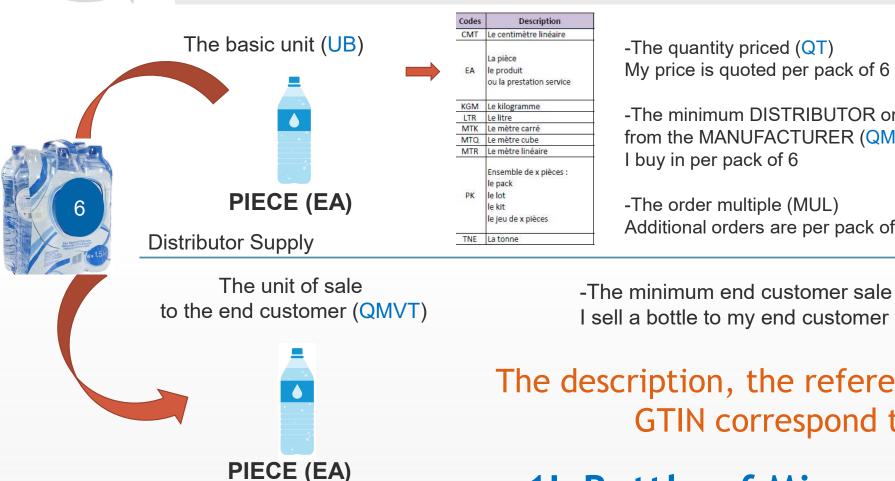

or BOTTLE (BO)

The description, the reference and the GTIN correspond to 1L Bottle of Mineral Water

Manufacturer price per pack of 6, sale to the distributor per pack of 6, distributor sale to the end customer by the bottle

or BOTTLE (BO)

My price is quoted per pack of 6 bottles

-The minimum DISTRIBUTOR order quantity from the MANUFACTURER (QMC)

Additional orders are per pack of 6

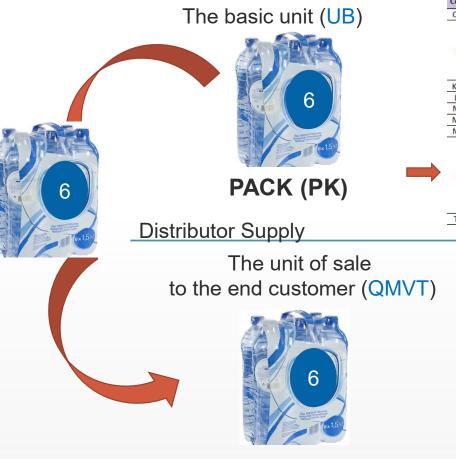

-The minimum end customer sale (QMV)

The description, the reference and the GTIN correspond to:

1L Bottle of Mineral Water

Manufacturer price per pack of 6, sale to the distributor per pack of 6, distributor sale to the end customer per pack of 6

BOTTLECRATE (BC)

Codes	Description
CMT	Le centimètre linéaire
	La pièce
ГА	
EA	le produit
	ou la prestation service
KGM	Le kilogramme
LTR	Le litre
MTK	Le mètre carré
MTQ	Le mètre cube
MTR	Le mètre linéaire
	Ensemble de x pièces :
	le pack
PK	le lot
	le kit
	le jeu de x pièces
TNE	La tonne

- -The quantity priced (QT) My price is quoted per pack of 6
- -The minimum DISTRIBUTOR order quantity from the MANUFACTURER (QMC)
 I buy in per pack of 6
- -The order multiple (MUL) Additional orders are per pack of 6

-The minimum end customer sale (QMV) I sell a bottle to my end customer

The description, the reference and the GTIN correspond to:

Pack of 6 x 1L Bottles of Mineral Water

1

The basic unit (UB)

- This is the pivotal unit that defines all of the others
- Expressed in Packs or Batches, it stops the sale to the end customer in indivisible quantities for sale

The minimum end customer sale (QMV)

- Direct incidence on the expression of the Description, the Commercial reference and the GTIN (Commerce Block)
- It is the recommended unit of sale. It constitutes a recommendation from the manufacturer to the distributor

Part II Focus on quality

II. 3.

Logistics

Optimise flows and minimise the ecological footprint

Why Logistics?

Optimise costs and storage space

- Reduce transport costs (30% of lorry volume not used in B to B)
- Avoid pricing errors on delivery costs
- Facilitate management and storage in warehouses (ecological footprint)

Identify the different packaging

- Packaging designed for identical articles (x products in x packages placed on 1 pallet):
- ▶ FAB-DIS enables indication of the number of products in different packaging, to be ordered

Logistics: Useful logic

Consumer units (QMVT)

All packaging must be expressed in relation to the Basic Unit (UB) in the LOGISTICS block

COMAP

Rubson Mastic Special Materials Isolation

Élastomère silicone mono composant de type acétique

Isolation thermique et phonique entre ouvrants et dormants de fenêtres, portes, lucarnes, peintes ou non peintes.

MISE EN ŒUVRE

Le support doit être propre, dégraissé, sec et dépoussiéré.

- (a) Couper l'extrémité de la cartouche avec le Cutter&Lisseur de Rubson. Visser dessus la carule et couper le bout en biseau à la largeur du joint souhaité.
- (b) Appliquer le mastic avec le Pistolet pliable de Rubson à l'endroit où il sera comprimé lors de la fermeture. Vous avez 5 min pour recouvrir entièrement le cordon encore frais avec la Bande de Démoulage Rubson.
- (c) Refermer avec précaution portes et fenêtres pour mouler le joint. Attendre 24h minimum pour ôter les bandes qui doivent se détacher faciliement du mastic.

Revisser le bouchon sur la canule pour prolonger la conservation. Nettoyer immédiatement les outils et la canule avec un chiffon sec.

CONDITIONNEMENT

Le Mastic Isolation est disponible en cartouche de 280ml.

CONSERVATION

Utiliser dans les 2 mois après poverture.

CARACTERISTIQUES	
Couleur	Translucide
Consistance	Mastic élastomère silicone mono composant de type acétique
Consommation	15 mètres de joint
Temps séchage	20min hors poussière, 24h au cœur du joint
Nettoyage des outils	Avec un chiffon sec
Etiquetage de danger	non

- Etanche à l'air, l'eau, au froid, au bruit et aux poussières
- Excellente adhérence our hois, métal, aluminium, PUC...
- Permet de compenser les déformations des menuiseries. Reste souple et résistance.

PRODUITS DE MAINTIEN

Produit de maintien hautes performances pour moquettes, PVC hétérogènes, dalles plombantes amovibles et sols stratifiés sur sous-couche.

DESTINATIONS

- · Moquettes à envers feutre, moquettes envers mousse
- PVC hétérogènes.
- · Produit de maintien pour la pose de dalles ou lames plombantes amovibles
- SAGA® de Gerflor
- Dalles TECSOM® à envers PVC de Tecsom
- · Sols stratifiés sur sous-couche.

AVANTAGES

- · Sans solvant.
- Piégeant puissant.
- Fixe les revêtements et autorise leur dépose ultérieure.
- Empêche la formation de poussière résultant du frottement.
- Supprime la lame d'air sous sols stratifiés (confort acoustique). Convient sur tous supports perméables et imperméables.
- · Poissant permanent sans limite dans le temps.
- · Faible consommation.

CARACTERISTIQUES TECHNIQUES

Composition : émulsion acrylique. Couleur : rose. Densité: 1,02 ± 0,05 pH:7±0,5

ADHESITECH

FICHE TECHNIQUE Edition RL/LL 22.06.2015

Caractéristiques & Avantages

Caractéristique Double protection

Le vêtement réfléchit les rayons infrarouges et offre une excellente protection contre la chaleur radiante. Il protège également des projections de métal en fusion qui ne restent pas sur le partaion mais glissent sur ce dernier et tombent au sol.

Caractéristique

Réalise en fibres para-aramides haute performance, cet article garantit un pouvoir isolant optimal et une excellente

Les produits de la gamme AluPro ont été conçus pour protéger l'utilisateur de la tête aux pieds, contre le contact

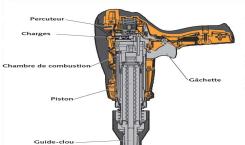

accidentel avec une flamme, les projections d'aluminium et de métal en fusion, la chaleur convective et la chaleur radiante élevée (performance C3).

Feedback

- ▶ Guillaume Quemener: Commercial Data and Referencing Manager
- Responsible for several group brands:

Context

02 LOGISTICS

04 REGULATORY

- Situation: We already have the data we need for FAB-DIS, but we might not know it!
- Priority for Mandatory blocks of FAB-DIS
- Several independent entities became 1 multi-brand company

Transform a problem into an opportunity by

Harmonising and centralising Product Data in the FAB-DIS for each brand

01 COMMERCE

03 MEDIA

 Managing the information systems to populate our FAB-DIS, matrix of our tools (ERP/PIM/DAM)

Media: key issue/Visibility

Problem 1

Structures of our original databases unsuitable

Difficulties identifying the article references with media

Automatic filling of FAB-DIS impossible

Solution

- Priority given to media in our price catalogues
- Population of FAB-DIS via the PIM/DAM

Data collection in FAB-DIS format

Problem 2

Multiple Product Data sources, different depending on the brand

Different processes in the circulation of Product Information

Disparate Product Data depending on the brand

Solution

- Identification of each brand's information sources
- Collection of information according to the FAB-DIS format

Population of FAB-DIS via the PIM/DAM

Moving forward with FAB-DIS

To meet customer expectations

- Optimise the systems (Compounds Components)
 - Introduction of the CORRESPONDENCE block/compounds in print catalogue

- More info as articles in other Blocks (Commerce, Logistics, etc.) are involved
- Link the installation engineer's needs to the distributor and vice versa

- Optimise performance/Reflection on the ETIM block
 - Vital for populating selectors/filters in Webshops

Who are we?

- ▶ Griffon belongs to the €2 million Bolton Group
- Division

= European leader in PVC glues

Our business

A wide range of multi-technical consumables used by professionals

- Griffon, a brand exclusively dedicated to professionals, sells innovative, high-quality products as solutions for site work.
- Leading brand in the sanitation industry, Griffon also sells its products in the construction, coverings, swimming pools, public works, industry, horticulture and irrigation sectors, etc.
 - Exclusively professional distribution
 - Major pillar of our strategy:

Organisation and support
of our partners
via FAB-DIS

Timeline: STEP by STEP

2017 2018 2019 2020

Handover of all customer matrices

- Implementation of FAB-DIS (Commerce + Logistics)
- **Manual** creation

- Integration of Media + Regulations part
- Easy-Check in Q3+ Q4 2019

- Easy-Check unified script
- IT Project (EU) automatic integration of data
- DOP, ETIM

20 matrices

8 further matrices

FAB-DIS + 3 matrices

A single matrix?

A European file

3 years of collection: 1st Review

- ▶ Difficult implementation: Adaptation of our tools to FAB-DIS
- ▶ **Productivity:** reduction of 20 matrices to 4 including FAB-DIS, which is the matrix that is asked for more and more
- **Easy-Check:** Vital for ensuring that data is issued correctly: no time wasted in exchanges for our distributors and **improved information reliability**
- The **Regulatory block** = 1 large file that will be integrated in 2020. Needed because asked more and more about standards, regulations (SDS, Technical Data Sheets, DOP, etc.). Furthermore, **gradual integration of ETIM**

DATA management

My FAB-DIS file = Reflection of my database at time T

Ensure the consistency between the up-to-date info transmitted in FAB-DIS and the distributor's database

When the FAB-DIS is 1st sent, take the opportunity to ask your distributors to clean up or archive their databases in line with your FAB-DIS

The exchange formats

- ▶ Proprietary matrices time-consuming
- Mixed (FAB-DIS + specific requests)
- ▶ FAB-DIS format: uniqueness and performance

Part II Focus on quality

II. 5.

Regulatory compliance

EVERYBODY's responsibility

Why REGULATORY data?

A duty to inform the customer (professional or private)

- Manufacturing process and performance (ACS, DoP, DoC, NFS, etc.)
- ✓ Conditions for storage, use and implementation (SDS, F-Gas, expiry date, etc.)
- ✓ Environmental and sanitary impact (recycling cost, energy and sanitary label, etc.)
- Manufacturer: must make the information available
- Distributor: must check its availability and circulate it

Confirm your conformity!

Nothing but essential Regulations...

18 Regulations

- DOP: Declaration Of Performance (CPR)
- E-ENV-SAN: Environmental and Sanitary Labels
- SDS: Safety Data Sheet
- DOC: Declaration Of Conformity
- PEREMP: Type of expiry date
- RECHANG: Availability of spare parts
- TRACE: Product traceability
- ..

- Obligation involving the data and/or documents to transmit
- Elements predefined by FAB-DIS to help you comply with the Regulations
- And supply and easily qualify these essential elements

ECO-CONTRIBUTIONS

Two types of eco-contribution <u>must</u> be <u>visible</u> to the buyer and passed on in full to the end customer...

Household WEEE

- Furniture waste
- ▶ The recycling costs for professional EEE also form an integral part of the sales price

They <u>can</u> be indicated on the invoice, although there is no duty to make them visible (e.g. unit price excl. tax <u>including</u> amount of the eco-contribution excl. tax)

SDS: Safety Data Sheet

- Document must be sent to the customer on request (REACH Regulation 1907/2006)
- Lays down the conditions for hazardousness, use, transport, etc.
- Indicates the storage constraints associated with the hazardousness class

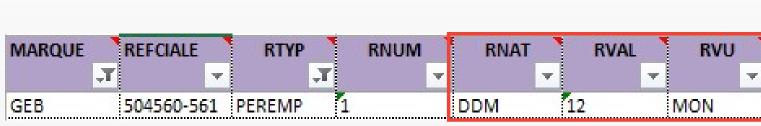

Expiry date: DLC/DDM

2 options for the products concerned:

- Use-By Date (DLC)
 - "Use by..."
 - Essential nature as hazardous for health
- Best Before Date (DDM)
 - "Best before..."
 - Loss of a specific quality but no hazard

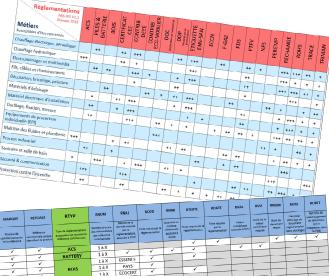

Period that runs from the date of manufacture

TIME for ETIM

Boost your e-commerce sales

TIME for ETIM!

<u>Video</u>

Available soon on www.etim-france.fr

Sanitation/Heating ETIM is:

- 6 manufacturers
- 10 distributors

Le concept

- Définir et caractériser les données techniques des produits
- Permettre une intégration et utilisation simple au sein des sytèmes

L'objectif

- Assurer la qualité de la donnée
- · Economiser du temps et des ressources lors des échanges

L'expertise

- Bâtiment & Second-oeuvre
- Electricité
- Sanitaire-chauffage
- Outillage

veulent ajouter!

ETIM

Les garanties

- Modèle indépendant
- Unique pour tous
- Utilisé mondialement
- Evolutif

ETIM WORLDWIDE

User members:

- ▶ Germany, Austria, Belgium, Canada,
- Denmark, Spain, USA, Finland, France
- Italy, Lithuania, Norway, Netherlands, Poland
- ▶ UK, Russia, Switzerland, Sweden

> New members:

- ▶ Portugal, Slovenia, Slovakia
- Prospects:
- Australia, Brazil, China, Estonia, Malaysia

Advantages & benefits

- Improve access to information: facilitate article searches thanks to the characteristics filled in (web search engines or associated with ERP)
- > Accelerate the launch of new products and solutions
- Quickly and easily product content: paper or electronic catalogues, customer e-catalogues, web content
- > Reduce costs associated with the production, circulation and use of data
- ➤ Get involved in development of the model to ensure that the technical characterisation of the products is relevant and managed
- > Partnerships with PIM publishers: ONE BASE and 3C EVOLUTION

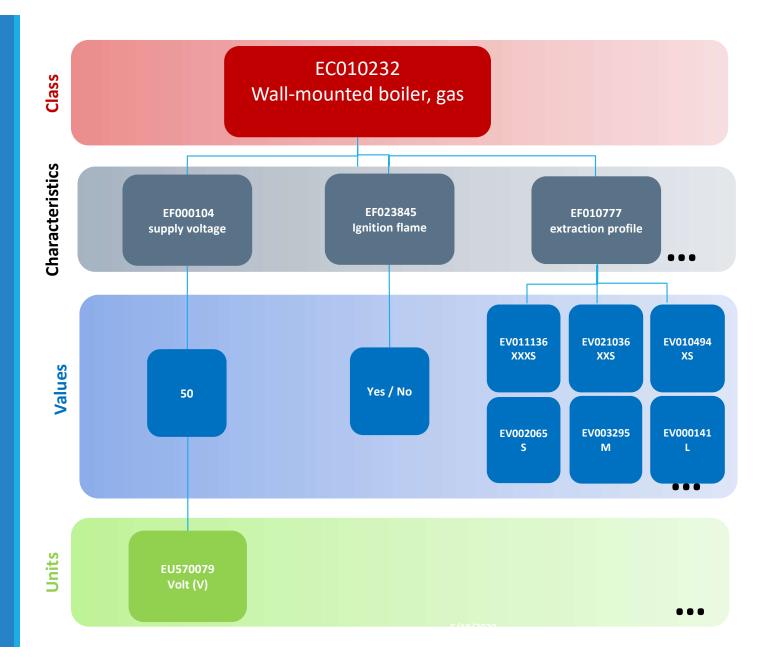

Structure

The ETIM model is based on four levels of detail to describe the products.

Each product can therefore be identified and characterised according to:

- A class
- Characteristics
- Values or attributes
- Units

And plenty of others...

The advantages of being a member

Membership of ETIM France helps you make the most of the ETIM model

Access to the complete file of French translations

Choice of format (Excel, Access, CSV, XML, etc.), it enables easy integration of the model into the systems

Full personalised support

Help with classification and integration, including telephone support and/or visits to members by ETIM, participation in events/internal presentations

Requests for change (RFC)

Participation in working groups to integrate the product specifics and innovations into the future versions of the model

Part III

Easy-Check by FAB-DIS

For error-free referencing of your products!

Part III Easy-Check by FAB-DIS

III. 1.

Issues and Benefits

Manage the conformity of your files independently

"A SCRIPT... AND MAKE IT QUICK!"

The current situation

- Anomalies and omissions hard to identify
- Different interpretations of what is expected
- Wasting time going back and forth
- Deadline constrained by application of the price

"A SCRIPT... AND MAKE IT QUICK!"

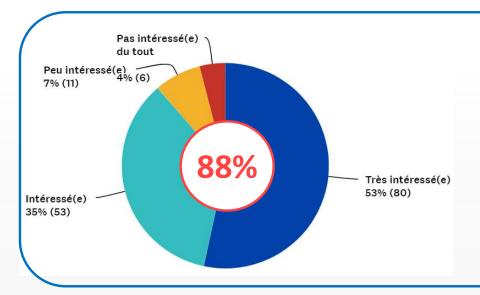

A widely shared need

Question 15:

Would you be interested in a unified control script?

88% of users (very) interested

Source: FAB-DIS satisfaction survey - July 2017 - 301 users

THE SOLUTION

Facilitate creation of FAB-DIS files

- Detection of anomalies
- ✓ Teaching tool to correct them

Authenticate compliant files

✓ Conformity guaranteed by the unique ID issued by the script and transferred to the title block

A FEW FIGURES

4,100 files tested

1 secure web solution

520 check points

> 300 user brands

8 months of FTE development

6' = average analysis time

Time savings of up to 40% on your referencing operations

Save time

- Reduce time wasted going back and forth with partners
- Focus work on the deviations identified (missing or poorly formatted data)

Independence

- Measure the effort required to restore compliance
- Establish indicators for data management

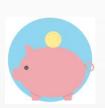

Expertise

- Rely on 1 neutral contact with an equivalent requirement level
- Facilitate appropriation of FAB-DIS internally thanks to the analysis report
- Motivate content producers to improve data quality

Savings

- No need to develop and maintain a "proprietary" script
- Optimise resources to enhance content (rather than formatting data)
- ... To exist online and choose rather than suffer the digital revolution

Unified script

Proprietary script

COMPLIANCE of the CONTAINER

(format, structure, integrity, completeness, etc.)

- Has the format been respected? (text, date, numerical, etc.)
- Are the unit and packaging given in an authorised value?
- Has any legal data been omitted?
- Is there a duplicate GTIN?

QUALITY of the CONTENT

(consistency, etc.)

- Is the price consistent with the previous edition?
- Is the description of the reference consistent with the minimum sales quantity?
- Does the media link available correspond to the reference in question?

CHOOSE EASY-CHECK AND:

- Produce files in FAB-DIS format completely independently
- Ensure their conformity with the requirements of the Reference Base (structure, integrity, completeness, etc.)
- Make content usable by all distributors
- But it is not a door opener for integrating the distributor's ERP (consistency, quality)

- ★ Save time
- Independence
- **★** Peace of mind

E-commerce

Feedback

Manage the conformity of your files independently

Everything you wanted to know...

- Easy-Check platform security?
 - Manufacturer files destroyed at the end of the check
 - Analysis report available to the user for 10 days
 - Only the 520 control rules are kept in the database

- > Speed of the 520 conformity checks?
 - Average response time: < approx. 6 minutes!
 - Report delivered in 2 stages to speed up processing (data/media)

Everything you wanted to know...

- Significance of the unique certification no.?
 - Issued for compliant files only (no critical errors)
 - Guarantees that the content can be used by the distributors
 - To be transferred to the file for authentication by the distributor

- Qualification required?
 - No technical skills required
 - Instructional analysis report provided in Excel
 - All you need is an internet connection and an Easy-Check account

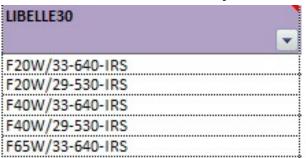

A real educational tool

The Easy-Check analysis report

BLOCK	Name of the Field	Value with error	Error message	EXTRACT FROM THE MANUAL DESCRIPTION of the FIELD
Where is th	ne error?			
Critical status?		What is	s the error?	
				How can it be corrected?

These descriptions taken from my product database seem perfect:

EASY-CHECK detects what the eye cannot see and what the distributor's system will reject:

EASY-CHECK checks my strings of text and reports the presence and position of forbidden characters

CRITICAL ERROR!

A forbidden character has been found in position 13

(ASCII code: 160 - display: '')

minaire étanche · à·LED·intégrée (s)-·IP65·-·IK08·-·Efficacité · nineuse · jusque à·101lm/W·-·Flux·lumineux · élevé · jusque à· 44lm·-·Disponible · en·Blanc·froid · (4000K) · et·Lumière · du · jour·

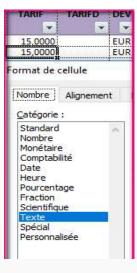

These prices in my Price column seem to display values:

15,0000 15,0000 16,6500 16,6500 18,3500 ▶ EASY CHECK tells me that this data is not Numerical

EASY-CHECK checks that the content of the columns is in the expected format

CRITICAL ERROR!

The format is text instead of NUMERICAL

16.6500

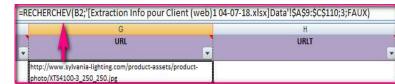

▶ These URL addresses appear OK in the MEDIA column required:

▶ EASY-CHECK tells me that the cell is not compliant. I have left a formula with a link that will be lost:

=RECHERCHEV(B2;'[Extraction Info pour Client (web)1 04-07-18.xlsx]Data'!\$A\$9:\$C\$110;3;FAUX)

EASY-CHECK helps me to guarantee that the user will receive a clean, usable file without having to go back and forth making corrections

The cell contains an error

#ERR!

This URL address has appeared in my FAB-DIS for several versions:

▶ EASY-CHECK tells me that this link is dead

Helps to implement the manufacturer's data

Value present but the URL is not correct

Impossible d'ouvrir http://dynamicassets.fr

This GS1 data is missing from my system for these loose products. I leave the column empty:

- ▶ EASY-CHECK identifies that the data is missing or that it is a duplicate.
- The GTIN is not mandatory but recommended:

Helps to always improve the quality of the data transmitted

NON-CRITICAL ERROR

The size 0 < min expected: 8

The GTIN helps to guarantee referencing in ERPs and its use in all sales channels (EDI application, logistics centre, merchant site, etc.)

This GS1 data is incorrect following an entry error.

- EASY-CHECK checks the authenticity of the GTIN
- Use of the GS1 key to guarantee its uniqueness

Helps to always improve the quality of the data transmitted

CRITICAL ERROR

The GTIN is unique.

It must follow the GS1 uniqueness rule

The GTIN helps to guarantee referencing in ERPs and its use in all sales channels (EDI application, logistics centre, merchant site, etc.)

In the Regulatory tab, I have indicated that my reference is in line with this regulation:

REFCIALE	RTYP
296061	CONTRYB

▶ EASY-CHECK identifies that this is not the code required for describing it

Checks the integrity of the data transmitted

CRITICAL ERROR!

The **CONTRYB** value is not authorised

16 authorised values:

ACS – BATTERY – TIMBER – ESC – **CONTRIB** -

Under the F-GAS Regulation, my product is subject to the Qualification Certificate and I have to declare the gas it contains:

REFCIALE	RTYP	
·	-	
ERWQ02AV3	RGRDF12	

EASY-CHECK checks that the gas code is properly defined in the F-GAS table of values

Helps to prove the conformity of my products

CRITICAL ERROR

I got the wrong gas code.

Gas type RGRDF12 does not exist

The refrigerant gas table checks 322 types of gas

Because I was in a hurry, I omitted the URLT link on the SDS, a code that I also did not fill in properly

REFCIALE		RTYP	RNUM	RURLT
	-		-	<u>.</u>
6306752		FDZ	1	

PEASY-CHECK guarantees the required provision of the SDS and checks the quality of all of the values in the Regulatory Tables

Helps to prove the conformity of my products

CRITICAL ERRORS

The Safety Data Sheet (SDS) must be provided for certain products in accordance with the wording of the "SDS" code

RURLT link missing
+ Entry error "SDZ" instead of the "SDS" code
defined in the Regulatory Tables

Easy-Check CONVERT

Make data formatting easy

✓ Does your IT system put data in columns whereas FAB-DIS demands them in a row structure?

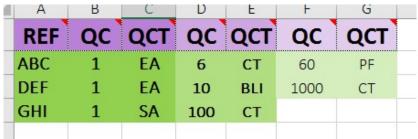

✓ Easy-Check CONVERT offers you a quick and reliable solution in your usual environment (Excel ribbon).

Easy-Check - Convert

I have collected my data to be published in FAB-DIS format

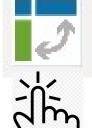

Prerequisites:

The order and title of the first columns must be in line with the FAB-DIS structure

The tool transposes the data in rows or columns as required by FAB-DIS

,	K	L	IVI	IV
REF	QC	QCT	EAN	
ABC	1	EA		
ABC	6	СТ		
ABC	60	PF		
DEF	1	EA		
DEF	10	BLI		
DEF	1000	СТ		
GHI	1	SA		-1
GHI	100	СТ		

In just one click, I get my data in FAB-DIS format

Easy-Check - Convert

- I want to make sure that all of the links and media for my products are present
- By grouping together types of MEDIA, the tool identifies what is missing

L		G
REF	TYPM	URL
Α	РНОТО	HTTP
Α	NOTICE	HTTP
Α	FICHE	HTTP
В	NOTICE	HTTP
С	РНОТО	HTTP
С	FICHE	HTTP
С	FICHE	HTTP

			TYPM		
Α	FICHE	НТТР	NOTICE	РНОТО	НТТР
В	1		NOTICE	?	
С	FICHE	НТТР	?	РНОТО	НТТР

In just one click, I can see that certain key data is missing

Easy-Check - Convert

> Save time on data formatting tasks that are repetitive and time-consuming

Quick and reliable, Easy-Check Convert provides the appropriate Excel tools for performing these tasks independently

► Easy-Check is **scalable**. As needs come from users... a suggestion box is available: souscription-easycheck@fabdis.fr
